## **Exhibition Pavilion Entrance Project**

The Exhibition Hall Entrance Project has been completed with new concrete footpaths leading to the Pavilion entrances and garden beds along the edge of the paths.

ETC's Work for the Dole team are continuing to work on creating gardens surrounding the entrance and paths which blend in with the natural, tranquil surrounds of the reserve.

Early in 2011 Novaskill's pre-apprenticeship course worked on renovating the foyer and the hallways of the Exhibition Hall. The entry to the hall previously had painted block internal walls and the ceiling had exposed steel rafters.

The group put new framework and a new ceiling, then plastered the walls and ceiling right from the entrance all the way through the hallway. New paint was applied creating a vibrant and modern entrance to the Hall.

The new entry is inviting, allows for entry ticketing and leads people into the main hall via two separate entry points.

More work is planned as funds become available to create an even better venue for the Coffs community. If you are interesting in donating materials or time to this wonderful community venue, please contact us on (02) 6652 8401.
